

# NAIL INFECTIONS qPCR PANEL

**Bio-Speedy® Nail Infections qPCR Panel** serves as a convenient gateway for in-depth exploration of fungal pathogens that cause nail infections. While many fungal nail infections are not inherently serious, if left untreated, they can potentially give rise to significant complications. Consequently, delving into the scientific underpinnings of such infections becomes crucial in order to enhance diagnostic support. The remarkable feature of the Bio-Speedy® Nail Infections qPCR Panel lies in its streamlined qPCR runtime, requiring only 65 minutes. This panel specifically targets 27 fungal pathogens across 8 wells, effectively paving the way to a comprehensive understanding of nail infections.

## FUNGI

<i>Aspergillus flavus</i>	<i>Epidermophyton floccosum</i>	<i>Trichophyton mentagrophytes/interdigitale</i>
<i>Aspergillus fumigatus</i>	<i>Fusarium oxysporum</i>	<i>Trichophyton rubrum</i>
<i>Aspergillus niger</i>	<i>Malassezia furfur</i>	<i>Trichophyton soudanense</i>
<i>Aspergillus terreus</i>	<i>Malassezia globosa</i>	<i>Trichophyton terrestre</i>
<i>Candida albicans</i>	<i>Malassezia restricta</i>	<i>Trichophyton tonsurans</i>
<i>Candida auris</i>	<i>Malassezia sympodialis</i>	<i>Trichophyton verrucosum</i>
<i>Candida glabrata</i>	<i>Microsporium audouinii</i>	<i>Trichophyton violaceum</i>
<i>Candida krusei</i>	<i>Microsporium canis</i>	<i>Trichosporon asahii</i>
<i>Candida parapsilosis</i>	<i>Microsporium gypseum</i>	<i>Trichosporon mucoides</i>

**Compatible Instruments:** Bio-Rad CFX96 Touch, Bio-Rad CFX Opus 96, Bio-Rad CFX384, Bio-Rad CFX Opus 384, Bioer LineGene 9600 Plus, Bioer QuantGene 9600 Real Time PCR Quant Studio 5, Quant Studio 6, Quant Studio 7
