

WOMEN'S HEALTH qPCR PANEL

Vaginal homeostasis is maintained by multiple factors, including the vaginal microbiota. Infections or an imbalance of symbiotic bacteria in the vaginal microbiota may lead to several diseases such as STIs, vaginosis, and UTIs. **Bio-Speedy® Women's Health qPCR Panel** is a unique large panel that covers most of the pathogens related to vaginal infections, facilitating research for a better understanding of the underlying causes.

10 SAMPLES / **65 MINUTES**

Compatible Instruments: Bio-Rad CFX96 Touch, Bio-Rad CFX Opus 96, Bio-Rad CFX384, Bio-Rad CFX Opus 384, Bioer LineGene 9600 Plus, Bioer QuantGene 9600 Real Time PCR Systems, Quant Studio 5, Quant Studio 6, Quant Studio 7

VIRUS

HSV-1

HSV-2

FUNGI

Candida albicans

Candida glabrata

Candida parapsilosis

Candida tropicalis

GRAM POSITIVE BACTERIA

Bacterial Vaginosis Associated Bacteria-2 (BVAB- 2)

Enterococcus faecalis

Fannyhessea vaginalis

Gardnerella vaginalis

Lactobacillus crispatus

Lactobacillus jensenii

Lactobacillus gasseri

Lactobacillus iners

Mobiluncus curtisii (Gram variable)

Neisseria gonorrhoeae

Staphylococcus aureus

Streptococcus agalactiae

Treponema pallidum

Trichomonas vaginalis

Ureaplasma urealyticum

GRAM NEGATIVE BACTERIA

Chlamydia trachomatis

Escherichia coli

Haemophilus ducreyi

Megasphaera phylotype 1 (MP1)

Megasphaera phylotype 2 (MP2)

Mobiluncus mulieris

Mycoplasma genitalium

Mycoplasma hominis

Prevotella bivia
