

LOWER RESPIRATORY BACTERIA qPCR PANEL

For better understanding the cause of lower respiratory tract diseases, laboratory studies can be supported with comprehensive qPCR reagents. Lower respiratory tract infections remain a major global health challenge, requiring precise and rapid identification of the causative pathogens. The Bio-Speedy® Lower Respiratory qPCR Panel offers a comprehensive solution for studying key bacterial pathogens associated with lower respiratory infections.

BACTERIA

Acinetobacter calcoaceticus-baumannii complex
Klebsiella oxytoca
Serratia marcescens
Enterobacter cloacae complex
Klebsiella pneumoniae
Staphylococcus aureus
Escherichia coli
Moraxella catarrhalis
Streptococcus agalactiae
Haemophilus influenzae
Proteus spp.
Streptococcus pneumoniae
Klebsiella aerogenes
Pseudomonas aeruginosa
Streptococcus pyogenes
Legionella pneumophila
Mycoplasma pneumoniae
Enterobacteriaceae

PRODUCT

Bio-Speedy® Lower Respiratory Bacteria qPCR Panel
